EDUCATION

Master in Computer Application, *Finolex Academy of Management and Technology, Ratnagiri. Mumbai University*
2024 – 07/2026
8.52 /10.0

B.Sc.Computer Science, *Gogate Jogalekar College (Autonomous), Ratnagiri. Mumbai University*
2022 – 2024
8.16 /10.0

TECHNICAL SKILLS

Test Automation & QA — Playwright with TypeScript | UI + API Hybrid Automation | Network Interception & Mocking
Web & App Technologies — ReactJS | HTML5 | CSS3 | Firebase | REST APIs | Kotlin Android Development
Programming Languages — TypeScript | JavaScript | Java | Python
AI & Agentic AI Skills — Agentic AI Workflows | MCP (Model Context Protocol) Servers | Prompt Engineering | AI-based Automation Assistance
Tools & Platforms — VS Code | Git & GitHub | Postman | Chrome DevTools | CI/CD Basics

ACHIEVEMENTS

App Phoenix In-House Software Competition "Phoenix 2023-24"- 3rd Position

Web Phoenix In-House Software Competition "Phoenix 2022-23"- 3rd Position

PUBLICATIONS

Symptom Intelligence: High-Accuracy Disease Prediction with Ensemble Learning,
International Scientific Research Journal
25/04/2026
Developed an AI-based disease prediction system using Ensemble Machine Learning (Random Forest, SVM, Naïve Bayes) with symptom severity analysis and deployed a web-based prediction prototype.

CERTIFICATES

Unity 3d Course, Game Development Intercollegiate course. |
UI/UX Design -Skill Based Course (Bartakke Institute of Information technology) |
Android app development using Kotlin (Infosys). |
Completed a UI/UX course on (Coursera). |
Robotic Process Automation (UiPath) |
Web Development Fundamentals (IBM SkillsBuild)

LANGUAGES

English | Marathi | Hindi

EXPERIENCE

Software Developer | Innodhruti, *Full-time*
06/2026 – Present
- Develop and maintain web application features using TypeScript, JavaScript and React.
- Build and extend Playwright test automation for UI and API flows to improve release quality.
- Collaborate with the team in Agile sprints, using Git and Jira for version control and tracking.

INTERNSHIP

Software Developer Intern | Innodhruti,
Client Project: Pharmarack (Enterprise Pharma Platform)
12/2025 – 05/2026
- Built enterprise-grade test automation for a pharmaceutical platform using Playwright and TypeScript with Page Object Model (POM).
- Automated UI + API integrated test flows, including API validation and network mocking.
- Reported and tracked defects in Jira within an Agile team.

RPA Intern - 04/2024 to 06/2024
Contributed to RPA development and deployment, performed testing and debugging, and collaborated with the team to streamline workflows.

PROJECTS

Nexly
Nexly is a next-generation peer-to-peer (P2P) chat platform

Medical Management System (Website)
Web app to manage pharmacy medicine sales and records.

QR-Based Attendance System (Software)
Python desktop app for QR code–based attendance with Tkinter and OpenCV.

Quiz Game Application (Website)
Dynamic quiz app with question management, scoring, and team collaboration features.
